

Intralinks Compliance Suite

Comprehensive insight into **all** VDRs touching your organization

For compliance professionals, managing risk is a top priority. Virtual data rooms (VDRs) are critical tools in M&A, banking and capital markets transactions as they facilitate secure and compliant information exchange across internal and external deal stakeholders and collaborators, minimizing external risk.

But what about **internal risk**? What happens when an employee inadvertently gains access to a VDR with MNPI or PII, or when they leave the firm or deal team? The consequences of malicious or accidental breaches can be dire: insider trading charges, steep fines, loss of business, and reputational damage.

As the pioneer and leader in VDR technology, we are well-versed in the issues facing compliance, risk, legal and operational professionals supporting financial transactions. Intralinks is **the only VDR provider** to offer comprehensive, detailed and actionable tools to mitigate the dangers of data exposure.

On average, an Intralinks client firm has **680 users** who can access a total of **3,670 VDRs**.*

*Average based on top 75 Intralinks customers by AUM.

Know your firm's risk and exposure.

Contact Intralinks for specific details on your organization's exposure to VDRs, transactions, MNPI, PII and other sensitive information.

ACCESS GATEKEEPER (AG)

Manage user access to all Intralinks VDRs for your organization

- Know who has access to which VDR(s)
- Restrict access to public-side information
- Enforce insider trading policies

ACCESS MONITORING SERVICE (AMS)

Get visibility into users' exposure to data
